**Summary of the
product**

Introduction

The Event Management System is a smart digital platform that simplifies planning and managing events like conferences, workshops, and social gatherings. It allows organizers to create events, manage registrations and tickets, send notifications, and track attendance easily. With a secure, user-friendly interface, it enhances communication and provides an efficient, time-saving experience.

Overall, this system provides a comprehensive, time-saving, and reliable experience that simplifies event management and enhances user satisfaction.

● *Product vision*

For	Event organizers and attendees
Who	Need an easy and secure platform to manage and attend events
The	Complete digital system for event management
That	Enables users to create events, manage tickets, send notifications, and manage attendance
Unlike	Manual systems or separate tools
Our product	Is a game-changer because it provides a smooth and secure experience for managing and tracking events from start to finish

Stakeholders

Primary Stakeholders (Direct Users):

- Event Organizers: Manage and create events using the system.
- Attendees: Register, pay, and participate in events.

Secondary Stakeholders (Supporting/Indirect):

- Marketing Team: Promote events and attract participants.
- IT Support/ System Admins: Handle technical issues and assist users.
- Security Staff: Ensure safety during events.
- Accounting Team: Manage financial records, payments

Scrum Team

Responsibilities	Member	Role
Define the vision and prioritize backlog items	Rand	Product Owner
Organize meetings and remove obstacles	Rana	Scrum Master
Develop front-end, back-end, database, and testing	Lujain Munirah Jumanah	Development Team

Product Backlog

A	B	C	D	E	F	G
#	Product Backlog Item	So that	Type	Priority	Status	Sprint
1	As an organizer, I want to create a new event by entering its title, date, and venue.	I can add upcoming events to the system.	User story	High	Complete	Sprint 1
2	As an organizer, I want to edit event details (e.g., date or venue) when plans change.	I can keep event information up to date.	User story	High	In Progress	Sprint 1
3	As an organizer, I want to delete an event	I can remove canceled or duplicate events from the list.	User story	High	Complete	Sprint 1
4	As an attendee, I want to fill out a registration form for an event online.	I can register easily without manual paperwork.	User story	High	In Progress	Sprint 1
5	As an attendee, I want to view my registered events and session details.	I can track which events I'm attending	User story	Medium	Not started	sprint 2
6	As an organizer, I want to define ticket types (VIP, Standard, Free, Early Bird)	I can offer flexible options for attendees.	User Story	High	In Progress	Sprint 1
7	As an attendee, I want to receive a QR code for my ticket after registration	I can check in quickly at the event.	User Story	High	In Progress	Sprint 1
8	As a user, I want to register using email or phone number	I can create an account with my preferred method.	User Story	High	In Progress	Sprint 1
9	As an organizer, I want to set a maximum capacity for each event	I can prevent overbooking and manage attendance limits.	User Story	Medium	On Hold	Sprint 2
10	As an organizer, I want to categorize events (conference, workshop, seminar)	I can organize and filter events more efficiently.	User Story	Medium	Not Started	Sprint 2
11	As an attendee, I want to receive reminders before my selected sessions	I don't miss any sessions I've registered for.	User Story	Medium	Not Started	Sprint 2
12	As a user, I want to reset my password via email	I can regain access if I forget my login details.	User Story	Medium	Under Review	Sprint 2
13	As an organizer, I want to send notifications to followers when a new event is created	I can increase engagement and attendance.	User Story	Medium	Not Started	Sprint 2
14	As an organizer, I want to add a short description for events on the homepage	visitors can quickly understand what each event is about.	User Story	Low	Not Started	Sprint 2
15	As an organizer, I want to display event images and logos	the event page looks more attractive and professional.	User Story	Low	Not Started	Sprint 2
16	As an attendee, I want to rate the event after attending	I can share feedback to help improve future events.	User Story	Low	Not Started	Sprint 2
17	As an attendee, I want to view the number of registered participants for each event	I can gauge event popularity before joining.	User Story	Low	Not Started	Sprint 2
18	As an organizer, I want to manage the final attendee list	I can confirm attendance and prepare event logistics.	User Story	Medium	In progress	Sprint 2
19	As an organizer, I want to send reminders for paid tickets	I can ensure attendees remember to attend and reduce no-shows.	User Story	Medium	Not Started	Sprint 2

● Sprint Backlog

A	B	C	D
#	Sprint Task	Derived From	Status
1	As an organizer, I want to create a new event by entering its title, date, and venue.	User Story #1	Complete
2	As an organizer, I want to edit event details (e.g., date or venue) when plans change.	User Story #2	In Progress
3	As an organizer, I want to delete an event	User Story #3	Complete
4	As an attendee, I want to fill out a registration form	User Story #4	In Progress
5	As an organizer, I want to define ticket types (VIP, Standard, Free, Early Bird)	User Story #6	In Progress
6	As an attendee, I want to receive a QR code for my ticket after registration	User Story #7	In Progress
7	As a user, I want to register using email or phone number	User Story #8	In Progress

Scrum Meeting

Meeting	Date	Attendees	Discussed Items	Assigned Tasks	Next Steps
Meeting 1	Day 1	• Rand (Product Owner) • Rana (Scrum Master) • Jumanah, Munira, Lujain (Developers)	Review the Product Backlog and set item priorities.	• Rand: Clarify the main tasks in the Product Backlog • Jumanah: Suggest prioritization of items • Rana: Discuss task distribution among team members • Munira: Monitor and adjust item prioritization • Lujain: Organize the meeting and document results	Each member provides a progress update in the next meeting.
Meeting 2	Day 3	All Members	Select high-priority items from the Product Backlog and add them to the Sprint Backlog.	• Rand: Identify the highest-priority items • Jumanah: Arrange the selected items in the Sprint Backlog • Rana: Ensure proper task distribution across the team • Munira: Enter the selected items into the Sprint Backlog • Lujain: Document updates and track progress	Prepare the Sprint for execution and finalize tasks for the trial launch.
Meeting 3	Day 5	All Members	Review the final Sprint Backlog and prepare it for implementation.	• Rand: Verify correct prioritization of all backlog items • Jumanah: Review the final version of the Sprint Backlog • Rana: Ensure proper task distribution • Munira: Apply any required updates or corrections • Lujain: Document the final version of the backlog	Close the Sprint and update the Product Backlog for the next cycle.

Summary of the product

The Event Management System simplifies organizing and attending events. Organizers can create and manage events, set ticket types, define venue capacities, and send notifications. Attendees can register online, receive QR codes for tickets, and get reminders. The system improves efficiency, reduces manual errors, and enhances the overall event experience for both organizers and attendees.

THANK YOU
FOR ATTENTION
